Technical Designer with a Computer Science background and 2+ years of professional experience at Moon Studios, working in a production Unity environment on complex game systems and tooling. I specialise in building robust tools, workflows, and systems that scale across teams and large codebases. My history spans both design and engineering, from designing and implementing scalable UI, to low-level binary analysis in Ida.

Experience

TECHNICAL DESIGNER, MOON STUDIOS ↗

July 2023 to October 2025

No Rest For The Wicked ↗

Worked on core systems, internal tools, and engine-level features in a production Unity environment.

- Led the design and implementation of core tutorialisation systems to improve the player onboarding experience. Including developing an abstract state-driven UI architecture, and the director system for controlling tutorials and measuring player engagement.
- Built and maintained internal editor tools and UI systems that increased iteration speed, stability, and usability for designers.
- Contributed to engine-level work, including Unity C++ source migration for macOS and Apple Silicon support.
- Diagnosed and resolved complex cross-discipline issues in a live production environment.

Education

UNIVERSITY OF PLYMOUTH

October 2020 to July 2023

BSc (Hons) Computer Science (1:1)

UNIVERSITY OF PLYMOUTH

October 2019 to June 2020

(CertHE) Earth Sciences

HELE'S SCHOOL

October 2016 to June 2018

A-Level (Geography, Biology)
